FANAL

The intelligence of matter

Our **Hi-Tech** collections represent a new way of understanding ceramics: lighter, more precise, better prepared for contemporary spaces. A surface that not only covers, but defines the character of the project.

Inspired by the purity of natural elements and developed with advanced technology, each piece is the result of a demanding process where matter reaches its highest expression. The power of fire, the rigorous selection of minerals and technical innovation combine to create a lightweight, resistant, stable wall tile with impeccable visual continuity.

Hi-Tech is the balance between design and performance. Creative freedom for architects and interior designers. Confidence for those who build. Durability for those who live in the space.

Wide surfaces. Clean lines. Seamless continuity. Spaces that breathe modernity, precision and harmony.

Because when technology serves design, the result is not just ceramic.

It is emotional architecture.

Fanal new soul, unique identity

Raw Materials

Technology that begins at the source

Selection of exclusive raw materials
that provide purity, homogeneity and
superior quality.

Process

Temperature that makes the difference

A superior firing process that
improves compactness, strength and
durability.

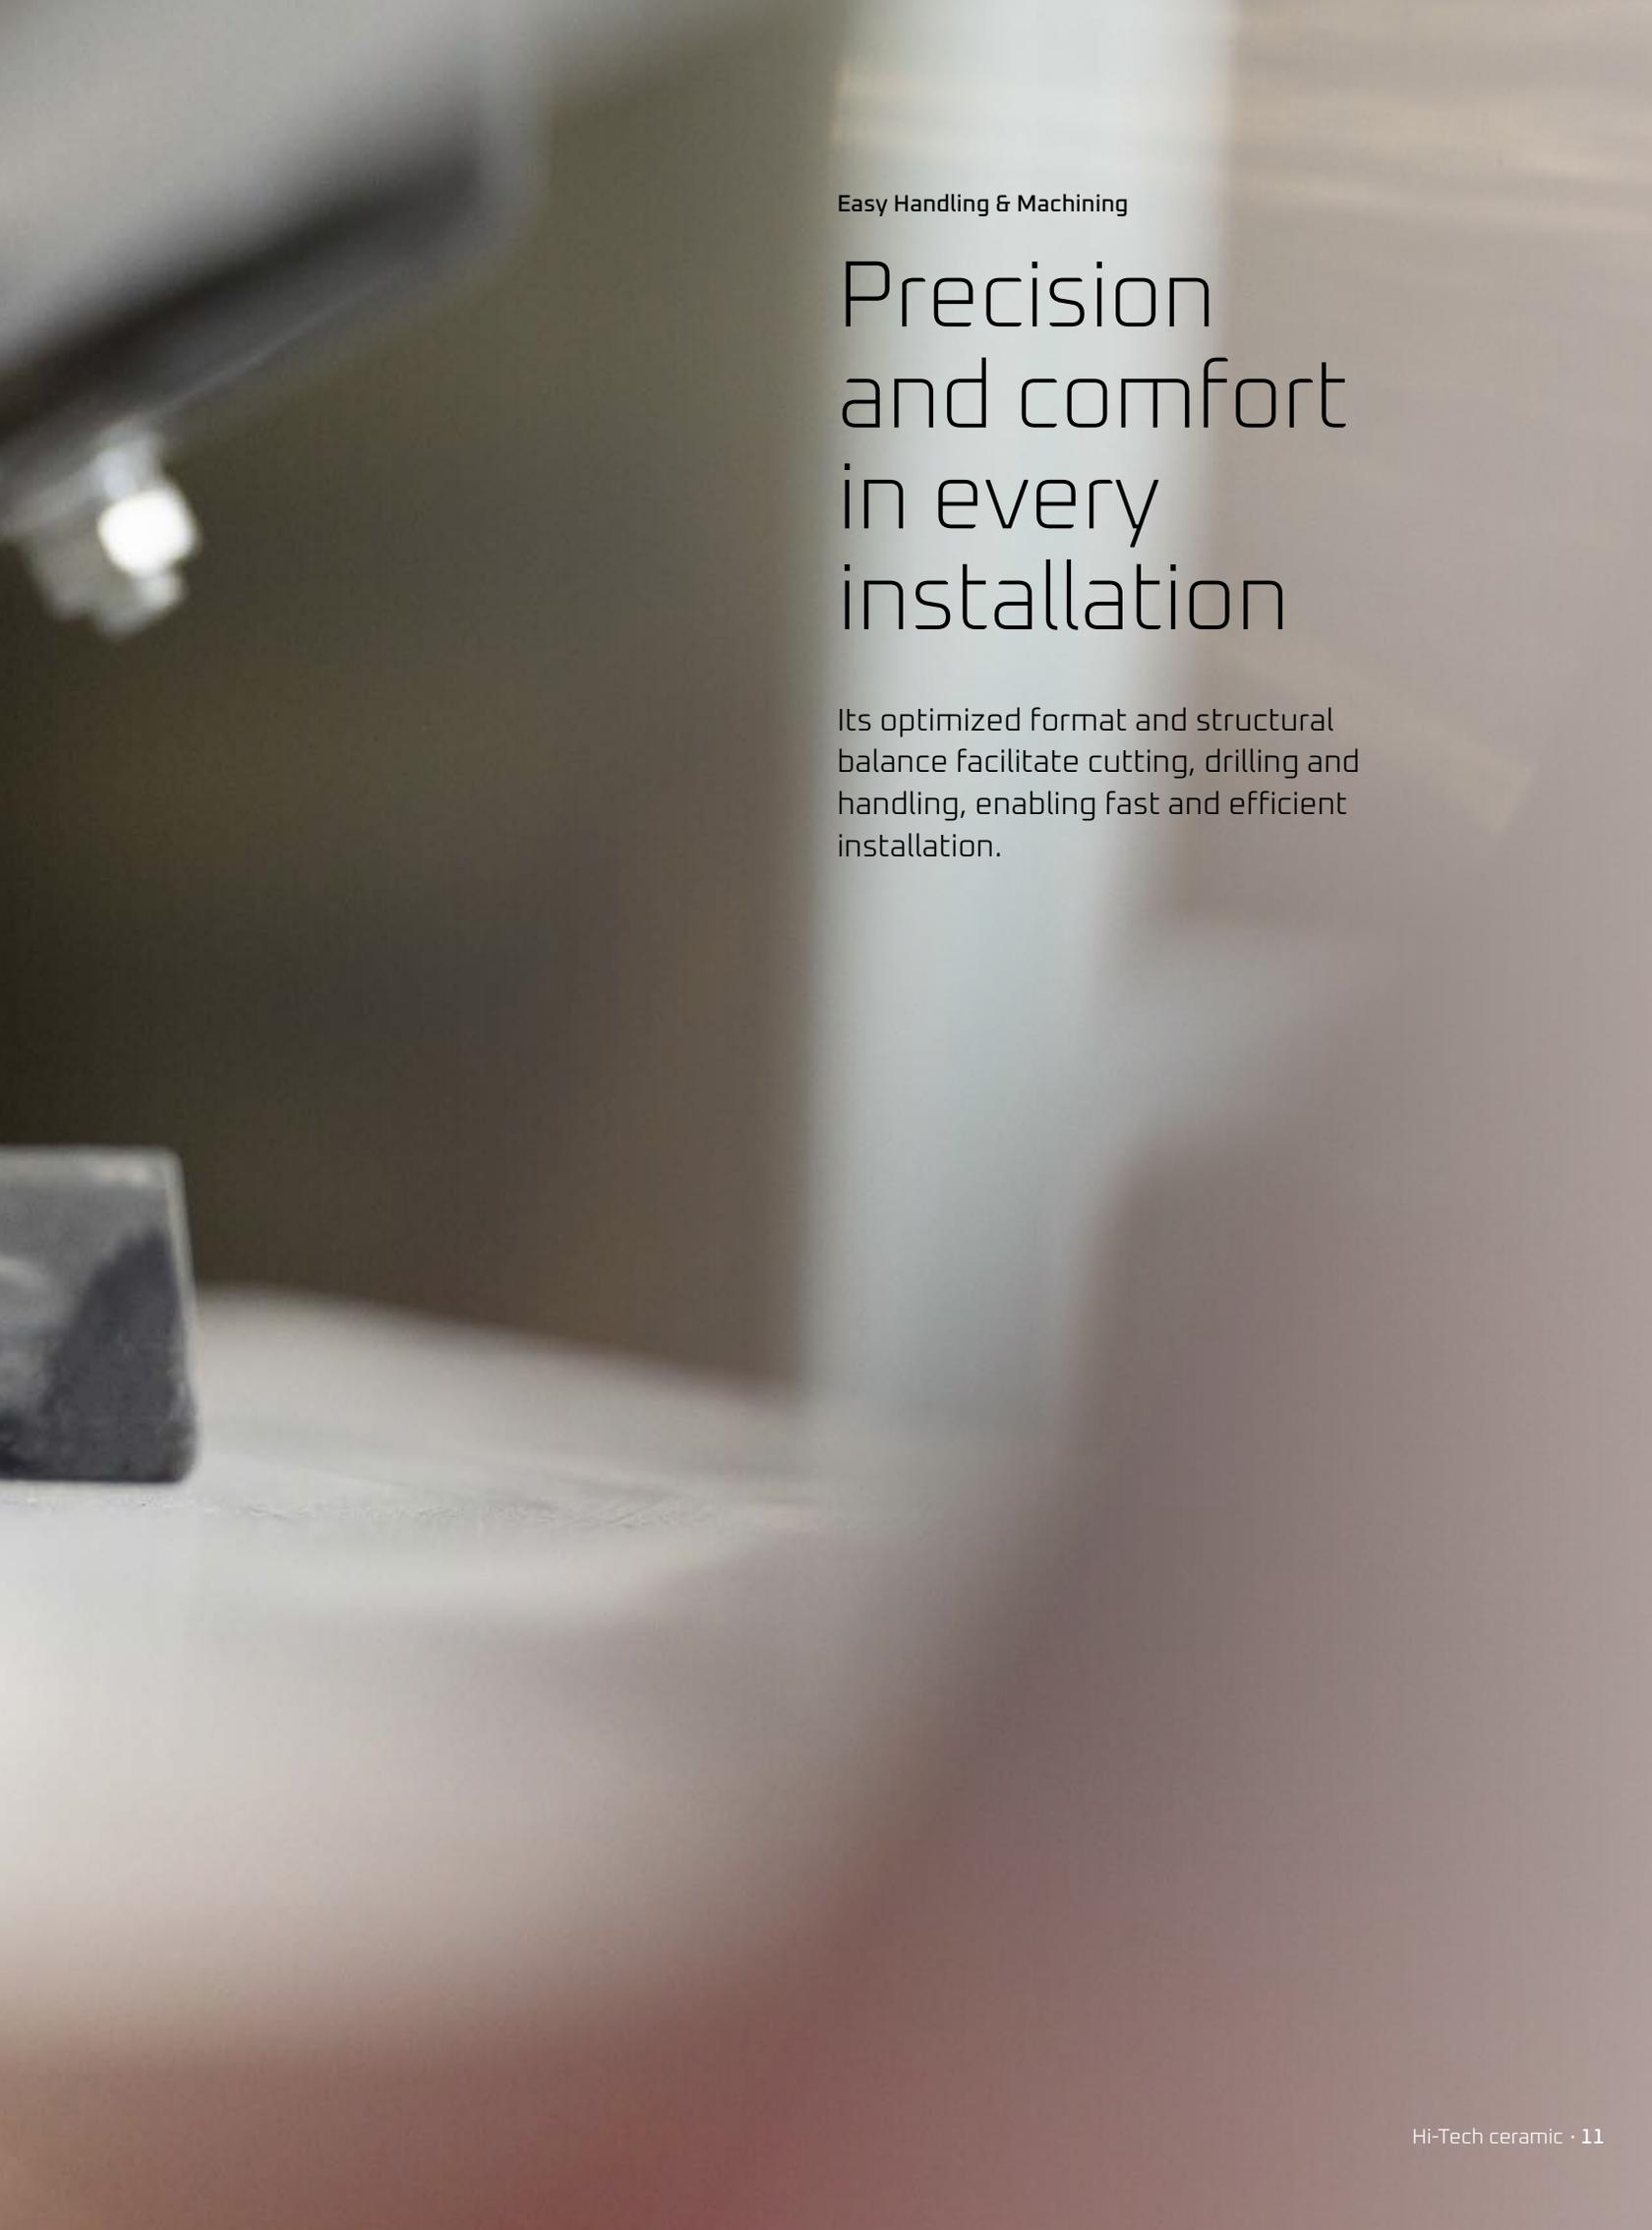

Lightweight

Maximum innovation with minimum weight

Hi-Tech ceramics offer a lighter structure that facilitates transport, handling and installation without compromising performance.

Easy Handling & Machining

Precision and comfort in every installation

Its optimized format and structural balance facilitate cutting, drilling and handling, enabling fast and efficient installation.

Resistant

Ceramics designed to last

The combination of selected raw materials and an optimized production process maximizes mechanical strength, ensuring stability and performance even under demanding conditions.

Dimensional Stability

Precision that ensures perfect finishes

Stable pieces that guarantee uniform joints and impeccable finishes for continuous, precise surfaces.

Decorative Continuity

Unlimited graphic development

Continuous design that allows
the creation of fluid, elegant and
uninterrupted surfaces where the
wall is perceived as a single plane.

New textures and colors
for unique projects.

Symbols

Meaning of the symbols and classifications used in this catalogue

Hi-Tech ceramic

High-tech ceramic tiles for cladding interior walls in residential or commercial spaces.

easy to machine

Ceramic wall tile with easy cutting, drilling, and handling.

wall tile

Ceramic tiles designed for covering vertical surfaces.

rectified

Ceramic tiles with cut edges to guarantee precise dimensions.

matt

Ceramic tiles with a non-reflective surface, offering a subtle and contemporary look.

graphic variation

Collection of tiles with a number of graphic variations between pieces.

destonified V1

Mostly uniform ceramic tiles with slight variation in color and/or graphics present in the appearance of wood, marble or stone texture.

destonified V2

Ceramic tiles with a moderate chromatic and graphic variation that represent natural materials, or vintage effects, wear and tear or peculiar materials.

destonified V3

Ceramic tiles with considerable tonal and graphic differences, even completely different from one piece to another.
